RES
Resource Energy Solutions

Manage all midstream construction, facilities, and pipeline projects by tracking project performance, capital planning, and daily activities & costs from start to finish.

MIDSTREAM
MANAGER

OVERVIEW

Project Life Cycle software that tracks project performance, planning and execution, from start to finish. Monitor, control, and report all field and office costs and daily activities throughout:

- Construction
- Cleanup
- Pipeline
- Facilities
- Maintenance
- Reclamation

MIDSTREAM
MANAGER

BENEFITS

- Work Flow and Operational Control.
- Daily project and cost management workflow between field and office.
- Standardize workflow for capturing and reporting Midstream data.
- Automate document handling and distribution.
- Eliminate duplicate sources of information created by ad hoc record-keeping and spreadsheets.
- Access all levels of cost detail, vendor and work history during the entire life cycle of the project.
- Perform detailed analysis and customized queries Increase profitability and competitiveness.

## WORKING WITH YOU EVERY DAY

ACCESSIBLE AND EASY TO USE

Access critical information quickly for an improved decision-making process. Automate daily reporting and summary reporting.

Easy to use! The user interface is based on a WYSIWYG (What You See Is What You Get). With Midstream Manager, user orientation and training is quick and effective, with most field users becoming productive in as little as 30 minutes.

PRODUCTIVITY AND ACCOUNTABILITY

Regulatory requirements are time consuming and costly, requiring better solutions like Midstream Manager.

Midstream Manager is designed to accurately capture in-field project costs and improve corporate governance while minimizing the liabilities and risks.
